
LA DISTRIBUZIONE DEI COGNOMI

TRA I DOCENTI UNIVERSITARI ITALIANI

Noms de famille et physique statistique

- Prenons enfin en considération les aspects du phénomène qui ont attiré particulièrement l'attention des mathématiciens et des physiciens statisticiens, qui sont beaucoup attirés par l'existence de structures universelles en phénomènes très différents et cherchent à expliquer leur origine dynamique par la construction de modèles mathématiques (dans ce cas modèles d'évolution des populations).
